2.3.1. Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Vaagdevi Pharmacy College provides an effective platform for students to build cutting-edge skills, knowledge, attitudes, and values that will help mould their behavior in the right direction. All departments run innovative programmes that stimulate students' creative abilities while also providing a platform for them to develop their problem-solving skills and assure participatory learning. Students are also encouraged to compete at the intercollegiate and national levels. The institute focuses on student-centered approaches of improving students' lifetime learning skills. The methodologies include illustrations and special lectures, field visits, case-studies, project-based-methods, experimental methods. This strategy aids in increasing their self-esteem and encouraging independence. Faculty members strive to make learning more interactive by allowing each individual student to comprehend at their unique level by assuring their participation in class activities so that they can absorb and grasp information at their own pace. Students' feedback on the Course and teachers at the conclusion of each semester provides an opportunity to discover any gaps that may then be corrected. The facilities arranged by the institute are listed below.

Experiential Learning

Faculty members promote a learning environment by engaging in rich experiential teaching content through experimentation, demonstration, visual aids, occasional industrial visits, organizing exhibitions, and delivering papers. The Student seminars are required in all programmes at the institute. Typically, students deliver seminars on current topics as well as cutting-edge technologies. All courses offered at the institute require project work. The implementation period lasts one to two semesters. The effective processes of survey, case study; implementation, testing, and report writing ensure that students receive the necessary project-based learning. Some disciplines are supplemented with learning while doing mini-projects. Projects and assignments are given to students in addition to the standard curriculum, which improves their capacity to absorb and convey additional information on a specific topic and gives them the chance to learn firsthand. Students tour the pharmaceutical sector and are given four weeks of training to help them learn the industrial manufacturing processes, quality assurance process, stability studies, and flow of the industry.

Participative learning:

In this type of learning, students participate in various activities such as seminar, group discussion, wall papers, projects, and the skill based add on courses. Teachers make classes as interactive as possible and encourage innovative thought and novel interpretations. Audio- Visual methodology, hands-on practice sessions, Industrial Visits, Field Work and Projects are some of the means utilize by the Institution to provide experiential and participative learning. The case study method is a participatory, discussion based way of learning where students gain skills in critical thinking, communication, and group dynamics. Appropriate integration of case studies in chosen subjects is arranged by the concerned departments. Implementation, testing and report writing ensure the required project-based learning among the students. Some subjects are augmented with learning through implementation of mini-projects.

Role plays

Students take part in clinical activities like patient-guiding during their pragmatic hours and furthermore permitted to take part in mock counseling sessions where students consider themselves as Patients.

Problem Solving Methodologies

- a) By adding case studies and tasks relating to the relevant course areas in theory or practical sessions, students' problem-solving skills are improved.

Self directed learning (SDL)

By offering reference materials and the use of a book bank, the students are encouraged to pursue independent study. By letting students use the advanced tools under instructor supervision, practical skills are built.

Project-based learning

The institute has established separate research committees that supports and helps students develop their research abilities in order to foster research activities by providing the required resources. The committee can be contacted by interested students via the research policy to help them with any of their research initiatives. In accordance with the research policy, students may

also receive travel and/or registration reimbursements for presenting their research findings at conferences, seminars, and poster competitions. Additionally, students are encouraged to write research papers with the assistance of teachers.

Interdisciplinary learning

The institution invites academics and students to participate in cross-departmental research projects in order to foster interdisciplinary learning. The research activities demonstrate the calibre of the institution, which has already been established through well-known publications.

Clerkship

During their curriculum, students will receive brief exposure to and training in a variety of practice settings, including businesses, pharmacies, and hospitals.

1. To give students a sense of what it would be like to work in the field.
2. To expose them; this will spark their interest in learning the material from a real-world standpoint.
3. To give students the chance to practise interacting and working with real-world experts.
4. The students would be exposed to "Patient" in various settings, which would help them understand the patients' requirements, the value of effective communication, and social, cultural, and emotional variables that cannot be replicated in a college setting.

The students ultimately benefit from all of these lessons as they prepare for their future careers as pharmacists.

Srikanth**, Associate Professor and Head, Department of Regulatory Affairs was the Co-ordinator of the webinar.

The webinar proved to be an insightful forum for discussion of IP developments and their application in India. The speaker, **Dr. V. Dhanapal** started his speech by giving an overview on Intellectual Property Rights and How to Write Patent, followed by applying for patents, copy rights and start-ups. He explained in his talk different categories of patent rights like Copyright, Trade Mark. Further, **Dr. Mirza R. Baig** briefed about processing of patents, challenges faced, how to protect IPR and solutions to progress. By the end of the session students gained knowledge on IPR. The Session ended by giving vote of thanks to both the speakers by Dr. P.Srikanth.

Report on One day seminar on Pharmacovigilance and Drug Safety

Name of the Programme : One day seminar on Pharmacovigilance and Drug Safety
Resource Person : Dr. Krishanveni
Founder CliniMed Aspire Academy

A One-day seminar on Pharmacovigilance and Drug Safety was conducted by Vaagdevi Pharmacy College, Bollikunta, Warangal on 29th October 2022. **Dr. Krishanveni**, Founder CliniMed Aspire Academy was the resource person and guest speaker. **Dr. G. Kamal Yadav**, Principal was the convener and **Dr. Vivek Sagar**, Associate Professor and Head, Department of Pharmaceutical Analysis was the Co-ordinator of the seminar. The topics of seminar included the value of quick access to medications, theoretical and practical difficulties, the advantages and disadvantages for society and the person, and the potential contribution of reformed pharmacovigilance to the best possible use of novel medications. The subjects were covered in great detail and with candor, supported by illustrative examples and personal experience. With their shared traits of clinical observation and suspicion, the parallel flows and parallels between pharmacovigilance and drug repurposing were explored, providing the framework for a potentially fruitful cooperative vision.

The meeting's consensus was in favor of quick access to certain, carefully selected medications, but with the explicit caveat that regulatory and pharmacovigilance systems had a primary duty to reduce harm and to ensure that new, flexible, and reliable measures had to be investigated and put into place.

Report on one day workshop on Pharmacist as software developers

Name of the Programme: One day Workshop on Pharmacist as software developers

Resource Person : Mr. BhanuCharan
CEO
Happy Business Company.

One day Workshop on Pharmacist as software developers conducted by Vaagdevi Pharmacy College, Bollikunta, Warangal on 10th June 2023, Mr. BhanuCharan, CEO, Happy Business Company was the Resource Person. He gave a brief introduction on software and explained the various aspects related to usage of software in pharmaceutical field. The session was handled by Dr. Mahesh Chidara, Associate Professor, Department OF Chemistry, Vaagdevi Pharmacy College.

The workshop proved to be an insightful forum for discussion of use of software in pharmaceutical industries. The Pharmacy Management System automates calculations in terms of purchases and accounting. Not only that, it automates the transfer of processes or modules. Thus, it minimizes errors across records. Resource Person interacted with the students and made the session interactive by providing small modules and assignments which was evaluated by the end of session. The session concluded with vote of thanks by Mr. R. Shiva kumar
